AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application.

Listing of Claims:

Claims 1–3 (Canceled)

Claim 4 (Currently amended): A method comprising:

   displaying, by a device, a diagram representing at least a portion of a human body;

   receiving, by the device, a selection of a part of the displayed human body;

   presenting, by the device, first aid information as a function of the selection; and

   performing, by the device, at least one step selected from the group consisting of:
summoning emergency medical personnel as a function of the selection, delivering an
electrotherapy to a patient, and generating an audible alarm as a function of the selection.

Claims 5–6 (Canceled).

Claim 7 (Previously presented): The method of claim 4, in which the electrotherapy
comprises a defibrillation therapy.

Claims 8–41 (Canceled).

Claim 42 (Currently amended):   A computer-readable medium comprising instructions for causing a programmable processor to:

　　　display a diagram representing at least a portion of a human body;

　　　receive a selection of a part of the displayed human body; and

　　　present first aid information as a function of the selection; and

　　　the instructions further causing the programmable processor to execute at least one step selected from the group consisting of: summon emergency medical personnel as a function of the selection, deliver a therapy to a patient as a function of the selection, and generate an <u>audible</u> alarm as a function of the selection.

Claims 43–82 (Canceled).

Claim 83 (New):   The method of claim 4, wherein performing, by the device, at least one step comprises performing, by the device, at least one step selected from the group consisting of: summoning emergency medical personnel as a function of the selection, and delivering an electrotherapy to a patient.

Claim 84 (New):   The computer-readable medium of claim 42, wherein the instructions that cause the programmable processor to execute at least one step comprise instructions that cause the programmable processor to execute at least one step selected from the group consisting of: summon emergency medical personnel as a function of the selection, and deliver a therapy to a patient as a function of the selection.
